Notes:

1. The stated width of the side bezel is the distance between the edge of the non-active screen display area and the inside edge of the case. If the case width is included, the side bezel width is 4.9mm. The stated width of the bottom bezel is the distance between the edge of the non-active screen display area and the visible edge of the display when the laptop is opened to 90°. Measured based on standard (not anti-glare) display configuration.

2. Based on Chromium OS power Load Test. 12 hours was determined by looping local video playback at higher than 80nits and the default display brightness level. Battery life may vary depending on usage type and conditions.

3. Weight may vary according to product specifications.
