Pristine Pictures Under Lights

With up to 7,000 lm1 from the world's smallest and lightest LCD projector in class², PT-VMZ71 Series cuts through bright ambient light to provide vivid, contrast-rich images without closing the blinds. Refined optical engine, 3,000,000:13 Dynamic Contrast, and Daylight View Basic further maintain image visibility in well-lit spaces.

Flexible and Versatile

Flexible 1.6x zoom and lens adjustment support projection from different angles, heights, and throw-distances, while a new 6-Point Screen Correction function enables projection into room corners without distortion. Digital Zoom Extender4 allows use of existing mounts with your new projector, even if throw-distance exceeds its optical zoom range, saving you time and effort.

The People-Friendly Projector

Get a smooth start to classes and meetings: two CEC command compatible HDMI inputs enable projector ON/OFF with the source device, and images appear quickly thanks to Quick On/Quick Off laser design. The projectors support 4K input signals via HDMI and DIGITAL LINK to simplify system construction and projector integration.

Power Consumption Reduced 20 %8

Select PT-VMZ71 Series models use about 20 %8 less energy than models in the previous series. Efficiency is further increased, and brightness optimized to ambient light levels, by pressing the ECO9 button on the remote. A change to Panasonic projection will reduce waste, save money, and contribute to your CSR environmental policy objectives.
